HIDAYA AWWAD

WEB DEVELOPER

I am a student majoring in Computer Science and Apprenticeship with a specialization in Software Engineering, currently still pursuing my degree.
I possess skills in web design and development, with strong analytical abilities that enable me to understand and solve technical issues effectively. I excel in working within cross-functional teams and am proficient in programming languages such as Python, C++, JavaScript, and Java.

Communication	●●●○○
Teamwork	●●●●●
Meeting deadlines	●●●●●

Experience

Back End Course
Mar 2024 - July 2024

I have taken a back-end course accredited by Knowledge Academy.

Collaborative Project

Project Name:A web application for CAP students at An-Najah National University.

Description: Our focus was on creating the front-end components of the site. As the team lead for the project, my responsibilities included coordinating the team's efforts, assigning tasks, and overseeing the design and implementation process.

Full-Stack Web Development Project

Project Name: Custom Event Card Creator

Description: I independently designed and developed a full-stack web application that allows users to create personalized event cards. Users can either design their own cards or select from a variety of ready-made templates tailored for different occasions, such as graduations, weddings, and birthdays,... . Each occasion offers several templates, allowing users to easily customize the card with their own text, images, and details.

Technologies Used:
- Front-End: HTML, CSS, JavaScript ,React
- Back-End: Node.js, Express
- Database: Mysql

Language

Turkish
